- Notes:
- 1) Arrow points north for most uses (the Apollo mounts can be rotated 90 degrees).
 - 2) The plate is fastened to the ground using 4 bolts 1/2 or 5/8 inch (see mounting c bore) holding the plate to the ground, while there are 4 leveling set screws on the outside corners (3/4-10 tpi) for a push-pull system.
 - 3) The plate weighs 35 lbs (16 kg).
